SUSTAINABLE FOOD PACKAGING MANUFACTURE AND DISTRIBUTION

SUSTAINABLE FOOD PACKAGING

YesEco™

We are your sustainable foodservice packaging partner. We are committed to your business and the green foodservice trends that are currently changing the overall foodservice market.

We are sourcing and procurement specialists. We manufacture many of our items internationally, producing a wide range innovative, high quality sustainable foodservice packaging solutions. Understanding your particular need is our business.

Sustainable foodservice packaging will help you advertise to your customers that you care about the environment. All of our packaging solutions can be customized and designed to meet your business challenges, using a collaborative partnership process.

Our world-class manufacturing vendors, are third party certified in ASTM, DIN, EN13432, and ISO to guarantee compostability. They also comply with FDA and CFIA food safety regulations.

YesEco takes pride in providing service excellence, which means getting the right order, to the right place, on time, on budget without errors.

With more than 30 years of foodservice experience, YesEco can assure you that our dedicated team of professionals are available to service your needs, as a partner you can rely on.

SUSTAINABLE FOOD PACKAGING

Biodegradable Sugarcane Products

Made from 100% renewable resources

- 100% Sugarcane & Bamboo
- Ultra Clean Plant technology
- Microwave safe
- Oven 400C
- No soak through
- Heaviest on market

* Bagasse products are 100% biodegradable and compostable. Bagasse products are natural fiber products and it biodegrades in 30-60 days. When bagasse products degrade, they provide natural ingredients back to environment since they are made from natural, organic and renewable materials.

* Bagasse plates and bowls are pressed in a high-heat, high-pressure process. Since sugarcane is renewable plant, its bi product – bagasse is a great raw material to make products including tableware products bowls, plates, clamshells, containers etc.

SUSTAINABLE FOOD PACKAGING

YesEco Hot Products

Made from 100% renewable resources

YesEco™ PLA (Lined) Hot Cups are fully compostable in commercial facility. They are not oil based (plastic) products and handle high heat. These cups are great solution for the environment. They meet all compostable standards and BPI certified.

They are soak proof and good for hot beverages. They are perfect alternative to hot cups that are lined with Polyethylene.

Corn can be grown again and again, unlike oil which is nonrenewable. **YesEco™ PLA** products have the added benefit of being compostable when you are finished using them. Composting is an opportunity to divert waste that would otherwise be landfilled — and by composting, you create valuable humus which improves soil so that plants can grow again.

SUSTAINABLE FOOD PACKAGING

YesEco Hot Products

Made from 100% recyclable resources

YesEco Hot Cup lids are produced from polystyrene with the thermoforming method and offered in three different styles. Their major advantage is that in contrast to the PET lids they can be used with hot beverages.

- Hot cup made with PLA (plant based resin) lined paper
- Made from 100% renewable resources
- PLA lined paper meets ASTM D6868, lid meets ASTM D6400
- Compostable in commercial compost facilities
- Paper available sleeve is recyclable kraft
- BPI Certified

YesEco PLA lined products provide the most environmentally responsible option for your customers.
